Time: Our Most Precious Resource

Time governs our lives, shaping our past, present, and future. It's the currency of life—finite and invaluable.

Managing time wisely is key to productivity and success. In our fast-paced world, it's easy to overlook its importance. Yet, every moment offers a chance to create, learn, and grow.

Cherish the moments with loved ones, invest in personal growth, and contribute to society. Time, once lost, is never reclaimed.

Let's treasure each second and make every moment count.

APPRECIATION COLUMN

On 13.02.2024, a patient reported back to the Department of Oral and Maxillofacial Surgery after extraction post college hours with profuse bleeding following surgical extraction.

At 4.45 P.M., paramedical staff, Ms. T. Vishnupriya and Ms. Maheshwari acted instinctively to help the patient in need.

Along with the on-duty PG, the necessary management was done and the patient was later shifted to ER at 5.50 P.M.

The patient had sent their message of gratitude through mail and the HOD, Dr. J Naveen Kumar had also presented a memento appreciating their service.

SRDC Cricket Team Triumphs at Sangamam '24-June 18th-22nd, 2024

The SRDC cricket team triumphed at Sangamam 24, a state-level inter-dental cricket tournament held from June 18-22, 2024, at Karpaga Vinyaga Dental College and Hospital.

Demonstrating exceptional skills and teamwork, SRDC secured victories in both the group and knockout stages. Their strategic gameplay and all-round performance led them to win the championship, marking a significant achievement for the team.

Praveen's Microtube Technique (PMT) For Broken File Retrieval from Root Canals.

“A Dentist who has not fractured a file, reamer or a broach has not treated enough Root canals”- Dr. Louis I Grossmann (Father of Endodontics). In today's age of access to information and easy availability of ‘second opinions’ from other Dentists, removal of a broken file from the Root canal has become a necessity to avoid embarrassment and save the tooth from extraction. As modern Endodontics has progressed, there have been several Instrument Retrieval devices developed such as Masseran's, IRS, Yoshi's Loop, PMT, BTR pen, etc which can grasp and retrieve the fragment loosened prior by ultrasonics very effectively. However, each technique has a critical caveat such as the fragility of loop device (only minimal forces may be applied to pull out the fragment) or the unnecessary dentin sacrifice with micro-trephines of the microtube techniques (Masserans, IRS, Zumax). They are also very expensive to use in regular clinical practice.

The Praveen's Microtube (PMT) Device (patent pending) is a Microtube plunger based Instrument Retrieval device made in India and Japan. Its unique microtube design allows dentin conservation whilst gripping the broken file tightly for efficient removal (Fig 1). It contains 14 different sizes of Microtube and few universal and assorted plungers which can be used for a range of scenarios such as apical file fragment removals and metal post retrievals (Fig 2). It is priced economically so that it is affordable for routine use in Indian Dental practices. Further information can be found via www.microsmiles.in or via Instagram handle [praveendo](https://www.instagram.com/praveendo).

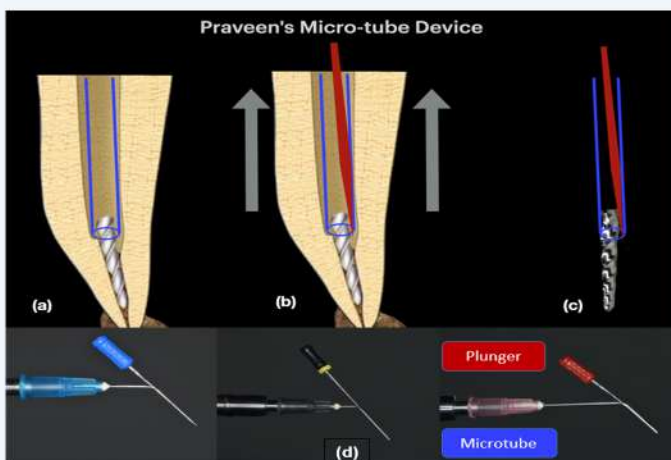

Figure 1: (a) The correct Microtube size is determined and inserted into the canal till the head of the file, till the head engulfs and is adapted around the broken fragment. (b) The plunger is then inserted to grip the broken file against the tube and (c) the entire assembly is pulled out with the broken file. (d) Three different sizes of Microtube and Plunger assembly are depicted.

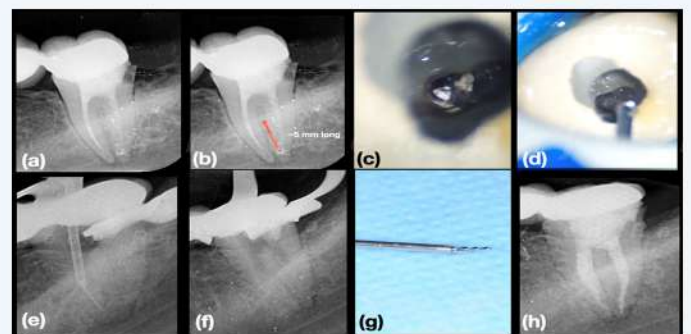

Figure 2: (a&b) Patient c/o pain in lower left teeth where a bridge was done 3 years ago. Tooth number 37 with a fractured file fragment in mesial canal and periapical radiolucency. (c) Access through the crown and GP retrieval done to expose the instrument. (d) After creating space for microtube using ultrasonics, the microtube was fitted around the head of the broken file. (e) Microtube try in IOPAR. (f&g) The plunger was adapted to grip the broken file and the entire assembly was pulled out successfully. (h) Post obturation IOPAR; patients symptoms were resolved.

Dr. Akash Chakravarthy

Dr. Akash Chakravarthy is an esteemed Oral and Maxillofacial Surgeon with an impressive academic and professional background. He earned his BDS from Sri Ramachandra Institute of Higher Education & Research, Chennai and his MDS in Oral and Maxillofacial Surgery from Saveetha University Chennai. Furthering his expertise, he attended the Harvard School of Dental Medicine and studied Dental Business Management in London.

A visionary in oral rehabilitation, Dr. Chakravarthy is known for his innovative approach to dentistry. He holds various prestigious memberships, including the Indian Dental Association, Telangana State Dental Council, and is a Fellow of the International Congress of Oral Implantologists. He is also an Executive Committee member for the Association of Oral and Maxillofacial Surgeons of India (AOMSI). In 2024, he was also elected as the Assistant Secretary of IAOI (Implantologists Association Of India)

Dr. Chakravarthy has been honored with the International Award of Excellence in Dentistry in London for his invention of Reflect. His patent-pending S.A.F.E Zygoma (Secure Access For Every Zygoma) protocol, is a revolutionary technique to ensure predictable outcomes in zygomatic implants. He is a key opinion leader for Sirona and Graphenano Dental Spain and serves on the Board of Advisors for CIPLA's dental division. He is also a certified trainer for Nobel Biocare Implants, Noris Medical and Alpha Bio Tech.

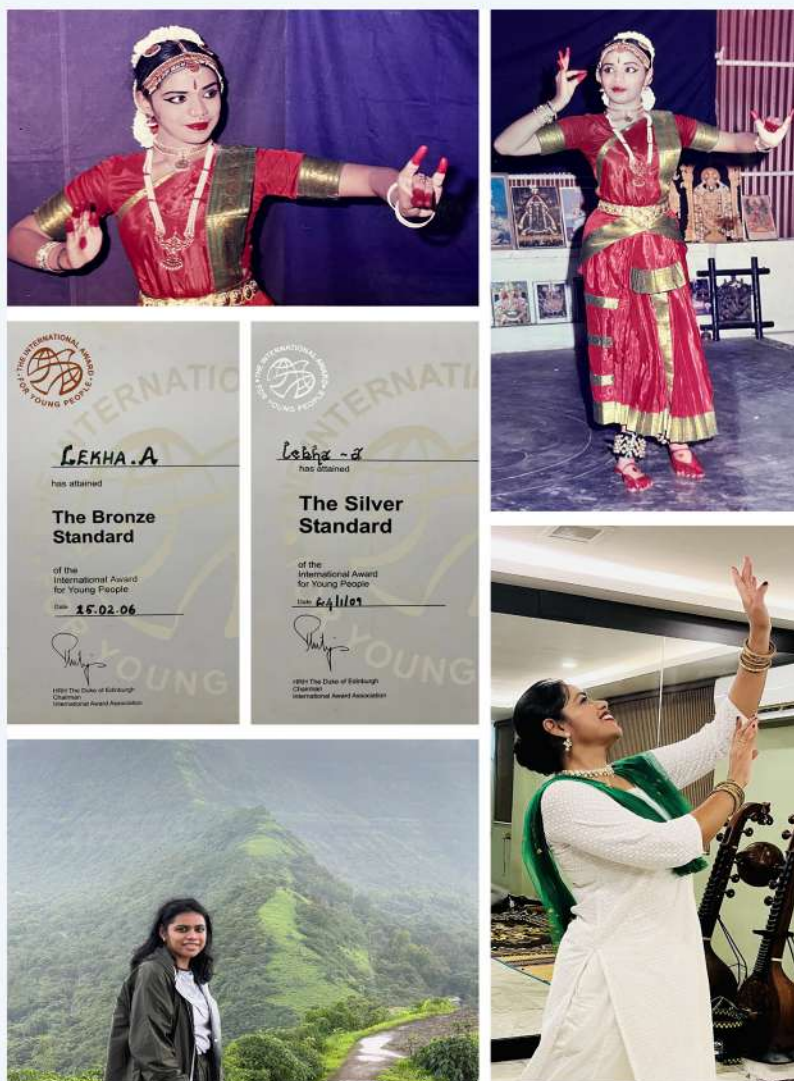

In addition to his clinical practice, Dr. Chakravarthy is a prolific speaker and mentor. He is the Director and Speaker at Saritha Dental Academy, an ICOI accredited center. He has conducted numerous lectures, hands-on training sessions, and live surgeries across India and internationally.

Dr. Chakravarthy's contributions to the field include three national patents and various publications on innovative dental procedures. He continues to pioneer digital dentistry in Telangana and Andhra Pradesh with the installation of the Cerec Sirona chairside CAD/CAM unit.

His hobbies include non-fictional reading, snorkeling, scuba diving, and driving. Dr. Chakravarthy is currently affiliated with several leading hospitals in Hyderabad as a consultant oral and maxillofacial surgeon and implantologist.

TALENT HUNT

FACULTY TALENT: Dr. Lekha Ashok

Dr. Lekha. A, is a multifaceted artist whose talents span a wide range of creative disciplines. She started her Bharatnatyam journey at the age of 7 and was trained professionally for 14 years under the eminent guidance of Guru Nrithya Kala Nipuna Smt Malathy Thothadry. She has performed on various stages and possesses exceptional skills in Bharatnatyam, showcasing an impressive ability to convey emotion through graceful movements. Being inquisitive to explore newer dance forms had opened her interest towards an ancient north Indian dance form "Kathak". She has been learning and performing Kathak for the past 3 years under the guidance of Guru Ms Akshitha, disciple of Padma Vibhushan, Pandit Birju Maharaj.

Beyond the dance floor, she is also a skilled artisan with a passion for handicrafts. She creates intricate pottery, blending traditional techniques with innovative designs, often resulting in unique pieces that embody both aesthetic beauty and personal expression. In the realm of visual arts, she excels in painting. She has learnt the skill of Tanjore painting and created art pieces depicting realistic depictions. She has showcased her dance and artistic skills in various intercollege competitions like MIDAS, Moksha and won accolades.

Apart from fine arts she is passionate in adventure activities like trekking and hiking and has received the "Duke of Edinburgh – International Award for Young People" Bronze standard in 2006 and Silver Standard in 2009. She loves to explore new cities and embark on trekking adventures. In recent times she explored the hills in Lonavala, Maharashtra, which journey deepened her appreciation for nature and tested her resilience, leaving her with lasting memories and new insights.

On the professional front, She is a Periodontist and has received Dr. Stella Sathyaraj Gold medal in MDS and Listerine Merit Award in undergraduate. She loves preserving tooth and sculpting your smile!

POSTGRADUATE:Dr. Tharini

Public speaking has been a passion of mine since 2009, though my journey didn't start so well. As a new student in 6th grade in a new school, I was put into the spotlight by a rule that required every student to speak on stage. My first attempt—a simple recitation of a Thirukkural was met with giggles as I stood there in front of 2000 students and staffs, unable to utter a word. That day, those five minutes of silence felt like eternity. It was my most embarrassing moment yet it became the spark that ignited my love for speaking.

Determined to overcome my fears, I started with small steps, like reading the news, participating in group activities on stage. With each successful attempt, I gained confidence. Watching talk shows, debate and oration of a few great people I admire helped me develop my speaking skills, and I learned how to engage audiences with language and delivery. Commentary during the annual day, sports event and all the celebrations in school became my stage, where I connected with the audience, and their applause was my greatest reward.

Now, public speaking is more than just a skill—it's my passion. Whether it's a debate or an elocution competition or anything with mic and audience, I embrace every opportunity to be heard. Even though I was rewarded with silver tiffin boxes and plates as prizes, each one motivated me to get another one. Those awards became symbols of my progress. The ability to connect with an audience is something I've cultivated over the years, and their energy fuels me, making every experience on stage fulfilling.

I speak both in English and Tamil. My love for speaking in Tamil, however, came from my mother who insisted that I speak in tamil. During my early school days, she wrote all my Tamil scripts, while I managed the English ones. She helped me develop my reading and pronunciation skills by making me read the running news on television, correcting me as I went along. It was through her that I began to appreciate the beauty and depth of Tamil—the emotions it holds and the essence it conveys. Her guidance fostered my passion for speaking in my mother tongue. For me, missing an opportunity to pursue what you love is akin to a sin. This belief led me to one of my proudest moments—an opportunity to host a live show on Suryan FM after winning an audition. It was an exhilarating experience, further affirming my love for the mic.

While my undergraduate years didn't provide as many speaking opportunities, I found a new passion during the lockdown: pencil sketching. Though I am self-taught and not professionally skilled, sketching became my way to escape times whenever I felt low.

I always believe that life shouldn't revolve around the same routine. Now, I am proud to be rekindling my passion for speaking at Sri Ramachandra Dental College. I am grateful for every opportunity to share my voice, and I look forward to many more. Thank you so much for patient reading.

TALENT HUNT

UNDERGRADUATE: Mokshaa Tejashwini

Mokshaa Tejashwini is a highly acclaimed and influential young artistic director in the realm of Bharathanatyam. Demonstrating an unwavering commitment to this art form, she has diligently devoted the past two decades to mastering and practicing Bharathanatyam, consistently refining her skills and expanding her knowledge. As a testament to her passion and expertise, Mokshaa currently leads her own institute, MOKSHAA INSTITUTE OF DANCE, where she imparts her wisdom and extensive experience to numerous students, nurturing the next generation of Bharathanatyam practitioners. It is gratifying to learn that she is leveraging her expertise in Bharathanatyam to generate awareness about significant topics like breastfeeding. Her choreography for Breastfeeding Week at SRMC exemplifies the effective utilization of art as a medium for education and the promotion of social causes.

Her accomplishments extend beyond her artistic endeavors. Mokshaa has also garnered recognition as a young entrepreneur, further diversifying her impressive portfolio. She has been the recipient of numerous prestigious awards, including the Rabaa book of world record 2022, esteemed Global Icon of the Year 2023, Natya Viruksham 2023, Jagranjosh Educational Summit Award under the category "Most Promising Talent" held at Delhi 2024. These accolades serve as tangible affirmations of her exceptional dedication, remarkable talent, and substantial contributions to the world of Bharathanatyam.

MOVIE REVIEW

MICHAEL MADANA KAAMA RAJAN REVIEW

SYNOPSIS - Quadruplets separated at birth under unforeseen circumstances, evolve to become different personalities... .. and reunite!

Where to watch: Sun nrt and amazon prime video
Cast & crew:
Director: Singeetam Srinivas Rao
Producer: Meena Panchu Arunachalam
Actors: Kamal Haasan, Kushboo, Urvashi, Roobini, Delhi Ganesh, Nagesh
Dialogue: Crazy Mohan
Music: Ilayaraja

The story juxtaposes the lives of the Kamal Hassans brought up in different strata giving you visual treat. Kamal Hassan, the one man who has strived to put Indian cinema on the global platform with his exemplary all round skills in cinema. This film is one of the grounds where his versatility in acting is showcased in terms of his mannerisms, dialect, voice modulation and body language clearly defining each of the Kamal. He carries out each role so convincingly that one starts to believe there actually are four Kamal Hassans in reality!

The storyline has so much depth that the director decided to narrate the prelude of the film in a single title track having faith in Ilayaraja's prowess in music. The screenplay is so exceptional that each scene blends into the introduction of each Kamal character. Kameshwaran's character adds to the humor element simply elevating the laughter component to the stratosphere.

If we delve into the nuances of the film, we could discover that like most Kamal's films, there were instances in this movie too where he did not fail to ingrain his ideologies into the movie.

In the era of use of artificial intelligence for deaging, this film has definitely been ahead of its times. Well aware of the technical handicap during those times, even during the scenes where the different Kamals meet, the director's angles were so immaculate that there was not an iota of doubt in the minds of the viewers.

The only major stereotype might have been the dragging "tilting house" climax! On the flip side, it does not end with the reunion drama that one would predict or rather, there is no scene where all four kamals share their emotions!!!

34 years after its release, the famous one liners "Bheemboi Bheemboi" and "Catch my Point" still persists on my lips and after having watched it innumerable times, I could be part of "Audible" sequentially reciting each and every monologue of the film.

Deservingly, the refurbished "per vechalum" soundtrack which appeared in the movie "Dikkilona" struck the same chord with the millennials and the Generation Z which is a testimony to the fact that the film is an all time cult classic!!
